

Highest levels of tissue quality and machine performance

TissueForm ITY

Advantages

- + Excellent drainage at highest speeds
- + Industry high fiber support
- + Industry best width stability
- + Industry high wear volumes achieving record lifetime
- + Industry thin caliper ensuring cleaner operation

TissueForm IT

TissueForm IT offers distinct and quantifiable operational advantages to tissue producers over previous generations of tissue forming fabrics. This forming fabric was developed with a high flexibility to be optimized for the full range of tissue applications – to match and exceed your requirements and expectations.

Find out about TissueForm ITY – woven with a 2-shed paper side for a smooth tissue surface.

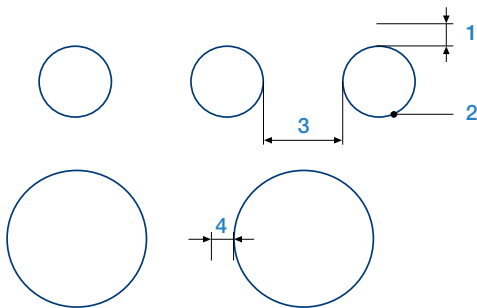

Unique I-Series warp yarn ratio

Quality

- 1 Lower thickness
- 2 More fiber support

Stability and service life

- 3 High open area for dewatering
- 4 Stability due to greater wear side diameter

TissueForm IT – Unique weaving concept

TissueForm IT is based on the unique and patented weaving concept of 3 over 2 MD yarns that offers the tissue maker industry high fiber support, best stability and wear volume.

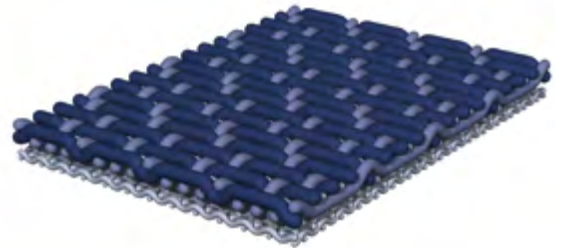

TissueForm ITY – Designed for operational excellence

The TissueForm ITY forming fabric combines a very fine 2-shed paper side with a 4-shed wear side to provide rapid drainage and high sheet support whilst maximizing fabric stability.

2-shed paper side for a smooth surface

4-shed wear side minimizing fabric caliper

A wide area of application

- + High-speed applications
(C-Wraps, S-Wraps, crescent formers)
- + Light-weight tissue production
- + Inner positions of C-Wraps
- + Virgin and waste fiber applications
