

Paper smoothness & printability +Pro

+Pro has an excellent, smooth and non-marking premium surface. It guarantees high wear resistance and stable running conditions. This improvement ensures high paper quality with the best printability properties.

Our +Pro is a modular treatment of our Efficiency Add-Ons. It is applicable to all types of press fabric applications.

Benefits

- + Sheet smoothness
 - + Uniform pressing
 - + Higher dryness
 - + Wear resistance
 - + Reduced break frequency
-

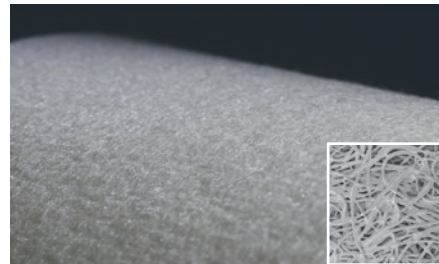

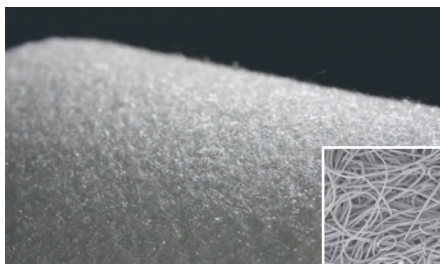

Standard surface vs. +Pro surface

Standard

+Pro

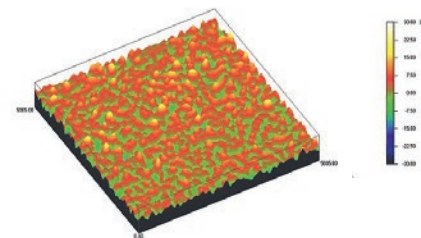

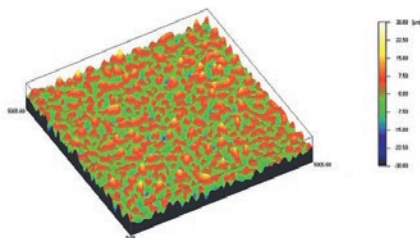

Press fabric & REM surface

+Pro is significantly smoother and uses a specially developed mixture of fine fibers and a binder system.

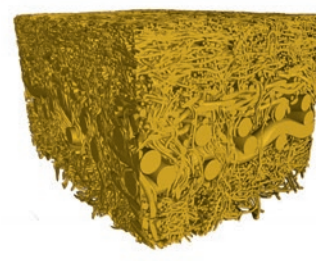

Topographic analysis

The uniformer the color the smoother the surface!

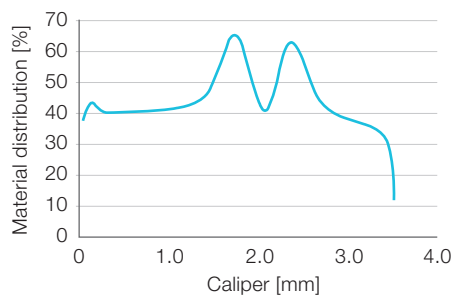

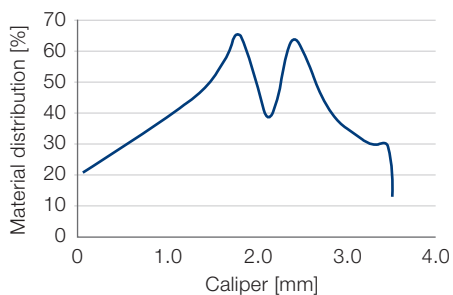

μ-CT

+Pro has a haptical and optical significantly smoother top layer surface.

Material distribution

+Pro surface displays a plateau in the measurement and therefore an uniform density in the top layer structure.
