

# OnCare.Asset

## Efficient asset and workforce management

OnCare.Asset offers efficient asset and workforce management to hydro-power plant operators.

From planning, servicing and documentation through cost control to spare parts management. OnCare.Asset enables reliable planning and monitoring of key performance indicators and finally the timely initiation of maintenance activities.

## Technical features

### Asset structure with graphical navigation

The clear graphical navigation facilitates day-to-day work. Without knowing the asset number, users can create notifications and easily find the right object.

### Work planning and scheduling

Visualized work planning and scheduling functions enable users to make quick decision and optimize maintenance tasks and workforce deployment.

### Flexible deployment

OnCare.Asset can be run on an on-site server or a cloud-based system in case of no or limited internet access. A cloud-based system is available for customers with one or more locations.

### Performance management

The application offers real-time monitoring of the overall organizational performance as well as cost and downtime tracking. Analyzing maintenance processes is easy, using up to 20 predefined KPIs based on maintenance best practices.

### Mobile application

All relevant maintenance information is available on mobile devices – anywhere, at any time. Users can give instant feedback on executed work.

### Material management

All available parts and materials are listed, and the application provides all information at a glance. New parts can be automatically reordered.

---

## Customer benefits

- + Reduction of administrative effort
- + 25 % less administrative time consumption
- + High usability for users
- + Modular packages for individual requirements
- + Integration in digital solution ecosystem by Voith
- + On average 10 % savings in maintenance costs after implementation
