VOITH

Measurement and diagnostic services Process services

Our Service –
Part of Your
Business.

We know your potential! Do you?

Problems in a paper production line are not always immediately obvious. Our specially designed analytical systems, closely combined with the many years of experience of Voith service personnel, help you to identify problems in short time, analyze them and solve them as a next step.

MobiLab

An optimized stock preparation can save energy, reduce fibers loss, improve product quality and therefore save money. To optimize your stock preparation, we offer a unique service for you: Voith's mobile wet-end lab container, MobiLab. This laboratory is fully equipped with all standard devices needed for wet-end analysis. Our customers benefit from the on-site data analysis, as they get the maximum trial output with no delay and no loss in the analyze quality due to wet sample conditioning, transport and storage issues.

3D Scan

To get an optimal planning reliability during a modification, Voith offers 3D laser scanning for rebuilds. Our excellent machine design and engineering experience enables a high-efficient usage of the 3D Scan technology, e. g., by doing a geometric checkup in the 3D CAD system for collision checking. Therefore, our customers benefit from highly reliable rebuild solutions with a lower likeliness of re-work and on-site adoptions.

SpeedUp Certificate

To make sure your machine can operate smoothly also in a speed above the original design speed, we offer a specific service: the SpeedUp Certificate. This certificate is used to do a safety evaluation. The speed-up trials can be done during a short shutdown with only 10 hours if necessary. Increase your machine speed without any rebuild, and get the full potential out of your paper machine.

Our experts can draw on years of experience and a rich service portfolio that is constantly updated with new technologies, such as our MobiLab mobile laboratory, 3D Scan or SpeedUp Certificate.

As a result, we can quickly deliver the service you need with the latest technology, wherever in the world.

This is what we mean by service at the next level. Integrated service intelligently adapted to meet the requirements of our customers – giving them a first-class customer experience. This is Servolution.
