VOITH

Inventory management of the future
OnCare.pmPortal

Information access, inventory and wear parts management is easy and efficient with OnCare.pmPortal.
Ensuring a comprehensive overview within one tool, OnCare.pmPortal, graphically illustrates the entire paper machine and includes all relevant data required.

Proving around-the-clock access to important product data, OnCare.pmPortal facilitates efficient stock management and provides status updates for each roll and fabric position.

Performance evaluations and predictable maintenance planning is possible when using our platform.

All data centralized in one software package

By linking OnCare.pmPortal with our internal systems, we ensure an automated update for Voith products. Furthermore, newly listed parts are displayed and an overview of the delivery status is provided for both new parts as well as rolls that are currently being serviced. Moreover, all service protocols are integrated enabling the portal to function as a central tool for all activities related to wear parts.
Graphical navigation of your paper machine

Enabling fast and intuitive navigation by means of a digital replica of your paper machine, OnCare.pmPortal also provides easy access to information. Individual positions and their components are easily identifiable. Furthermore, installation and removal of products as well as a standardized performance assessments are provided. Last but not least, OnCare.pm Portal supports you in your planning by identifying components and their positions requiring attention.
Reports and evaluations

Our customized reports are designed to contain important paper industry specific information, in the format you prefer because understanding data at a glance is important. That is why portal reports can be viewed in two modes, either as a list or as a graphic. A list, for example, will provide an overview of the available residual thickness of your roll covers effectively. However, when measuring the runtime over several products on the same position, a graphic format is better.

One-stop & shop

Facilitating a consistent process from product identification through to spare part management and re-ordering, OnCare. pmPortal operates perfectly, everything you require is found inside this system. By integrating the Voith Paper Webshop into OnCare.pmPortal platform, reordering of wear parts has never been easier.
